

290123 Moorfield Road Open Space Design Proposals – Consultation Feedback

This document summarises community consultation responses to the proposed design improvements for Moorfield Road Open Space. The designs were shared online between 5th – 18th of January 2026. A total of 13 people responded to the structured survey questions, with 11 providing written comments.

Q1: How do you feel about the design proposals for the Improvement of Moorfield Road Open Space?

Respondents expressed generally positive views toward the proposed improvements:

- 53.85% (7 people): Like the design proposals
- 38.46% (5 people): Like some elements
- 7.69% (1 person): Do not like the proposals

This indicates a strong overall approval, with nearly 92% expressing at least partial support.

Q2: We do hope you like the proposals, so if there is anything that you do particularly like or if you have any concerns, or if you would like to make any other comments about them, please do so below. Thank you.

Open ended feedback revealed a mix of enthusiasm, constructive suggestions, and a few concerns.

Key themes are:

Positive Feedback

- Several respondents praised the range of features, noting they would appeal to diverse community groups.
- Strong support for a useful circular accessible path connecting entrances.
- Community groups (e.g., Deep Wells church) welcomed picnic tables, additional usable space, and felt the design addresses previously requested features.

Requests for Additional Features

- Multiple calls for more play equipment, especially toddler-friendly areas (swings, slides, or a fenced toddler zone similar to Illogan Park).
- Desire for toilet/changing facilities, important for visiting families.
- Suggestion to place the path on the park's outer edge.
- Clarification needed for the dog exercise area.

Questions About Practicalities

- Who will maintain the space, and what is the annual cost?
- Will dogs still be allowed, and will there be regularly emptied dog waste bins?
- Queries about the hall extension: its purpose (community room, office, or additional hall space?) and impact on current hall users.
- Timing of construction and potential disruption.

Critical Feedback

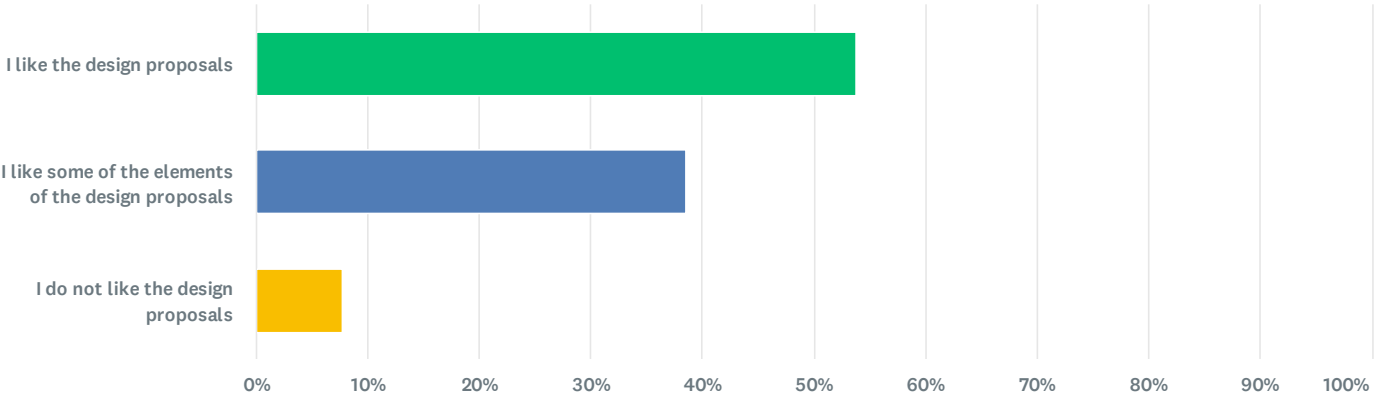

- One respondent felt the project was an unnecessary use of taxpayer money, preferring the space to remain an open field without aesthetic interventions.

General Conclusion

The community's response is broadly favourable, with strong support for many elements of the proposed design. While some concerns were raised—mainly around cost, practical facilities (toilets, dog areas, maintenance), and clarity on hall extension plans—the overall response suggests a community ready to engage and looking forward to expanded, well-thought out facilities that support families, community groups, and recreation.

Q1 How do you feel about the design proposals for the Improvement of Moorfield Road Open Space?

Answered: 13 Skipped: 0

Answer Choices	Percentage	Responses
I like the design proposals	53.85%	7
I like some of the elements of the design proposals	38.46%	5
I do not like the design proposals	7.69%	1
Total		13

#	RESPONSES	DATE
1	I think the proposals have a good mix of elements that will appeal to a wide section of the local community so that the park will hopefully be well used and appreciated.	1/16/2026 8:23 PM
2	I think it's all a waste of tax payers money. There's nothing wrong with it being the open space it always has been. Segregating it all, and putting in various, in your view, aesthetic improvements, won't make it more attractive to me. It's an open space for a reason, but won't be that after you've wasted loads of money on it. But anyway, you, the council will do what you want regardless.	1/16/2026 11:46 AM
3	Who will maintain the space and what is the anticipated cost per annum? Will dogs still be allowed and will there be bins for poop that are regularly emptied?	1/14/2026 7:39 PM
4	There really really would be benefit from a little play park - a swing and slide atleast.	1/14/2026 7:12 PM
5	The path should be to the outer edge of the park.	1/14/2026 12:47 PM
6	I really like the plans. The main thing is the usefulness of the path and the fact it joins all the entrances to the circular path so it's accessible all year. The rest is a good use of the space and includes just about everything that was mentioned in the initial stages. I'm glad there's a way to keep the goal posts and the open area of the field.	1/14/2026 11:54 AM
7	Love to see more play equipment	1/14/2026 11:44 AM
8	Thank you for taking the time to consider redevelopment of the Moorfields road green space. As a community group who use your space weekly we think the proposals for the new space as fantastic. We feel we would make good use of the picnic tables with our group as somewhere we can all sit together in the warmer weather outside. Currently the benches provided are too spaced out for our needs. Our children who use our service sand are often outside are very keen to explore the new areas. We do have a couple of questions if possible. 1) We note there is to be a hall extension. I cant find any particularly details regarding this. Is this an extra space for the community to use, a further office space or simply making the existing hall bigger (it looks from the plan to be a separate room). Currently the children who use our service are located in the entrance vestibule but an extra space for them would be fantastic! 2) when are the works likely to take place and do you see it having an impact on the current users of the hall? Many thanks. Deep Wells church	1/11/2026 5:08 PM
9	I think the proposal is great as a "phase 1". There is still a lot of plain green grass area. Ideally you would add a toddler play area up near the community hall now or as "phase 2". Look at Illogan Park for a very good design. If you could put in the same as their fenced off area and the toilet/changing block, that would make our open space perfect. There is a lot of room for the same.	1/6/2026 1:04 PM

Moorfield Road Open Space Improvement Project Design Proposals

10	I think the proposal looks great and will be fantastic if fully realised! More people would definitely use this setup. The only thing I would like to point out, is that parking is limited and there are no toilet facilities mentioned. Obviously not so relevant to locals who live nearby but for other families with children that want to visit the park, toilets and/or changing facilities in particular are essential.	1/6/2026 12:12 PM
11	Dog exercise area is not clear, this needs to be shown for full inclusion.	12/23/2025 2:45 PM
